Résumé

Senior software developer with 10 years of experience, mostly in typescript environment.

I have collaborated on many projects from different industries such as Fintech, Edtech, MedTech and Gaming, from the first fundraising to the scale-up.

I like to bring and create value by focusing on best practices and methodologies, I'm a Clean Code's adept. Eager to collaborate within an inspiring team, I pay attention to the value a product brings to its users.

Driven by curiosity, I like to explore different technical ecosystems without tying myself to a single stack. I try to actively cultivate a tech-agnostic approach, focusing on fundamentals.

My goal: to deliver well-thought-out, reliable, and maintainable products that create real value.

Expérience

Murphy Labs

Senior Software Developer

avril 2023 - mai 2025 (2 ans 2 mois)

The Murphy Labs team is pleased to introduce Majora -- an omnichain social yield infrastructure.

Majora is a cutting-edge platform that is revolutionizing the way in which yield is generated within the DeFi ecosystem. Through an innovative omnichain infrastructure Majora provides users with the ability to easily CREATE and implement complex yield strategies across multiple chains, while also facilitating the way to SHARE these strategies with their respective communities, users and clients.

Majora offers a seamless experience for users to EARN profits through any protocol on any chain, making it easier than ever to their assets at work. Whether users are seeking to maximize their yields, minimize their risks or explore new opportunities in the DeFi space, Majora provides the tools and infrastructure needed to achieve their objectives. By democratizing access to advanced yield strategies and leveraging the power of DeFi, Majora is poised to transform the landscape and unlock new possibilities for investors and strategists alike.

As part of a very small team, and as a senior typescript developer, I was in charge of Majora's various front-end applications. I also worked closely on the development of various backend tools (API, SDK, etc.).

- ReactJS
- NextJS (page/app router)
- Typescript
- Mantine
- ReactFlow
- Recharts
- Wagmi/Viem
- EthersJS
- TanStack Query
- Sentry
- NestJS
- PostgreSQL
- GraphQL
- Docker
- GitLab CI/CD
- Husky, esLint, JEST...

Yumon

Senior Software Developer

juillet 2022 - mars 2023 (9 mois)

France

Yumon is the first player-owned creator fantasy world.

Build powerful decks, create the best combo and earn from your weekly performances while supporting your favorite creators.

As a lead typescript developer, I built the first version of the fantasy card game (NFT based) and the marketplace, dedicated to the digital creator economy, with a team of 3 frontend developers.

- Immutable X
- Web3Auth
- NextJS
- Typescript
- SWR
- Mantine
- Sentry
- NestJS
- Jest - Testing Library
- Github Action / Heroku
- AWS S3
- Cloudflare
- Figma
- and more...

PrepAcademy

Senior Software Developer

février 2021 - juin 2022 (1 an 5 mois)

Lyon, Auvergne-Rhône-Alpes, France

As a Javascript developer, I participated in the migration of a monolithic Symfony architecture to two separate front and back-end applications in a team of 3 developers, as a scale-up preparation.

- REACT: ecosystem
- NEXT: SSR (SEO contenus)
- STORYBOOK: shared UI Kit library
- ESLint (custom Conf based on NEXT and AIRBNB styleguide)
- Conventional commit
- SPRINT PLANNING
- Scrum 2 semaines
- Versionning semver
- Gitflow release management
- GitLab
- Jira

Aéroclub ARC

Software Developer / Project Owner

septembre 2019 - février 2021 (1 an 6 mois)

As part of my freelance activity, and on behalf of an association of which I am a member, I had to review the entire platform currently in place and propose a redesigned project.

ARC, a club member of the French Aeronautical Federation, is a small structure with a human size that allows its members to train and fly on its aircraft. From the preparation of his flight, to the reservation of the aircraft, through the club news, the objective is to offer an "all-in-one" platform where the pilot can find all the information necessary for his good practice of light aviation.

Weather report on the planned route, information on diversion airfields, fuel balance calculation, airspace regulations, feedback and digitization of the pilot's logbook. Still in the development stage, this application could be offered as a white label to all the federated flying clubs in France, in order to standardize certain procedures with the French Civil Aviation Authority.

The project is presented with a client application in Next.js (React) for its server-side-rendering qualities, and a dedicated API in Node.js (Express).

- React | Next.js | Typescript
- Node.js | Express.js
- MongoDB

Freelance

Software Developer

juin 2019 - février 2021 (1 an 9 mois)

Ville de Paris, Île-de-France, France

Fullstack Typescript Developer | Craftmanship

Stack : JavaScript, React (Next, Gatsby), React Native, Node (Express), MongoDB, MySQL.

Simplon.co

Web trainer

octobre 2019 - juin 2020 (9 mois)

Élancourt, Île-de-France, France

Simplon, a training organization from the social and solidarity economy, provides training in digital professions throughout the world. In collaboration

with the factory of Elancourt (78), and as a web co-trainer, I followed a promotion of 26 students in the course "Web & mobile development" for a period of 7 months.

From the learning of the web, its culture, and its different entities, to the elaboration of a complete project in agility, passing by the watch of the various most fashionable technologies of the moment, the curriculum aims at forming complete profiles, able to collaborate on various projects.

During two days a week (14 hours/week), I was in charge of teaching the know-how and the best practices of the front end and mobile web, and I accompanied the students from the analysis of the need to the online launch of their projects.

HTML | CSS | JavaScript | Typescript | React
PHP | Node.js
MySQL | MongoDB
Git | Agile

Graduate:

- Titre RNCP de niveau III - Développeur web et web mobile (niveau BAC+2)
- Certification Méthodes agiles de gestion et amorçage de projet
- OPQUAST - Maîtrise de la qualité en projet Web

SURF, Agence de Communication Intégrée 360°
Software Developer
octobre 2019 - mars 2020 (6 mois)
Boulogne-Billancourt, Île-de-France, France

For a client in the hotel industry, and via a digital agency, I participated in the implementation of various web interfaces aimed at acquiring new users, following the new law on data security.

In the form of mini-games, the temporary marketing campaign consisted in placing historical monuments on a map (in drag'n'drop) at their right location. If the user succeeded in the game, he/she obtained a discount code for a reservation in one of the group's hotels.

- React
- PHP

Grisbee

Software Developer

octobre 2016 - octobre 2018 (2 ans 1 mois)

Versailles, Île-de-France, France

Grisbee offers you a complete tool to monitor and control your assets online, find out how to reduce your taxes or prepare for retirement, take stock of your inheritance costs... A tool that gives you control over your financial decisions!

As an apprentice front end developer, I had the chance to gain a lot of experience with the partners, and to discover many aspects related to the management of a company.

- strength of proposal
- design of flyers/graphic elements
- realization of front-end models
- front-end integrations
- development of new client features
- versioning and agility
- maintenance and refactoring

The challenge of this mission lies in the complexity of the data to be filled in by the user. In a process of experience and gamification, I took part in the meetings concerning the various interfaces of the processes, and the integration of these in the tool.

- HTML | CSS (Bootstrap) | JavaScript
- Java (Grails)
- MySQL | MongoDB
- Git | Agile

At the end of my apprenticeship, my experience at Grisbee continued as a mobile developer. The objective: to propose to the users a mobile application, which will allow them to follow the course of their patrimony in the daily life simply. I was in charge of the conception and the realization of this application.

- React Native
- Redux

Cabinet d'audit en Architecture

UI/UX Graphist

octobre 2015 - septembre 2016 (1 an)

Paris 75003

Conception and realization of works on the theme of architecture (model | fabrication | layout)

As a Graphic/Web Designer, I have collaborated with various French architects in the realization of their projects of calls for tender as well as works and websites for advertising purposes.

From the definition of the specifications with the client, to the printing or the online publishing of the project, I had the chance to intervene on many domains and to understand the design process as a whole.

This first professional experience was extremely enriching, and gave me a solid foundation that I use every day.
